

Millennium Cave Tour

A relatively new tour available in Santo is this awesome walking adventure. Not for the faint hearted, this full day tour involves a lengthy bush walk and requires some degree of fitness.

“Definitely worth the effort, you will be amazed at the stunning scenery.”

Your guide will lead you through narrow jungle paths, across creeks and cascades and over bamboo bridges to reach the Millennium Cave.

This massive cave stretches 20m across and some 50m high. A bamboo ladder will take you from the mouth of the cave down to a crystal clear pool fed by a small cascade.

From here you will journey through a magical realm of sparkling stalactites and stalagmites, with freshwater pools and thousands of tiny bats and swallows, their homes made high up in the roof of the cave.

Once you’ve made your way through the cave to the riverside, it’s time for a light lunch before you float down the fresh water river

towards home.

Whilst floating down the shallow quick-flowing river, take in the breathtaking scenery with its thermal falls’ and towering rock faces. You can’t get any closer with nature than this!

The tour finishes with a walk back up to the village where the tour started and a bus trip back to your hotel.

This is a full day trip with lots of walking. A medium fitness level is required to really enjoy this energetic tour.

Lunch is not provided, but picnic lunches can be pre ordered through your resort/hotel with a days notice.

Pack a light bag with plenty of drinking water, lunch and a towel.

It is advisable you wear comfortable shoes which will get wet and possibly muddy. Dive booties or old running shoes are best.

♦ TIP.

Wear swimmers and comfortable clothes. Once you have had lunch, a guide will take any bags or items which you don’t wish to get wet, back to village where you will return too.
