

GET INTO SANTO

See it all. Do it all.

World War II History Tour

“Santo was a home to 100,000 military personnel during the second World War, and boasted five airfields, four hospitals and many services for the armed forces who were based here.”

Your scenic drive will take you to Million Dollar Point, where the American Military dumped tonnes of equipment in to the ocean at the end of the war.

This historic point is now an excellent spot for divers & snorkellers with everything from bulldozers and trucks to ammunition and Coke bottles.

History buffs will enjoy stories about Santo during the war and visit the remnants literally scattered around the island.
